## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 26 – 30 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,727,569 to Gardner et al.

Regarding claims 26, 28 and 30, Gardner et al. teach a semiconductor structure (Fig. 9), comprising:

- a support (102);
- a first material (104) deposited on the support;
- a trench formed through the first material and into the support; and
- a trench filler material (110) deposited in the trench, the trench filler material inherently having an etch rate that is less than 1.2 time the first etch rate and substantially similar to the first etch rate, since both materials are the same and deposited by CVD (Col 4, lines 8 and 9; Col. 5, lines 45 – 48), the semiconductor structure having a planar exposed upper surface formed of the first material and the trench filler material.

Regarding claim 27, Gardner et al. teach a semiconductor structure, wherein the first material is deposited by chemical vapor deposition. With respect to the source of the material being from tetraethyorthosilicate or a silane and oxygen system, this is considered a product-by-process limitation. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

Regarding claim 29, Gardner et al. teach a semiconductor structure, wherein the trench filler material includes silicon dioxide deposited from tetraethyorthosilicate (Col. 5, lines 45 – 48).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 26 – 30 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
